SANPC DMS — Confidential | Page 1 of 31

1. Introduction

1.1 Purpose of This Manual

This manual is designed to help all SANPC staff understand and use the **SANPC Document Management System (DMS)**. Whether you are uploading a new policy document, reviewing a procedure, approving a strategy document, or simply searching for a controlled document, this manual walks you through every step.

1.2 About SANPC DMS

The SANPC Document Management System is the organisation's official platform for:

- Creating, registering, and storing all controlled documents
- Managing the review and approval process for policies, procedures, and related documents
- Ensuring all documents are properly authorised before release
- Providing a full audit trail of every action taken on every document
- Maintaining retention schedules in line with governance requirements

The system enforces SANPC's internal document control policy (ref: CSS/PR/CSF/005) and ensures that only properly reviewed and approved documents reach "CONTROLLED" status and are made available to staff.

1.3 Scope

This manual covers the following system features:

- Login and navigation
- Creating and uploading documents
- Submitting documents for review
- Performing reviews (for Reviewers)
- Performing approvals (for Approvers)
- Releasing controlled documents
- Managing users (for Administrators)
- Viewing reports

SANPC DMS — Confidential | Page 2 of 31

1.4 Who Should Read This Manual

Section	Target Audience
Sections 1–6	All users
Section 7	Document Controllers / Document Managers
Section 8	Reviewers
Section 9	Approvers
Section 10	Originators
Section 11	System Administrators
Sections 12–17	All users (reference)

---

2. System Overview

2.1 What the System Does

SANPC DMS provides a structured end-to-end process for document lifecycle management:

```
Document Created → Review → Approval → Board/EXCO (if Policy) → Controlled Release
```

Every step is logged, every decision is recorded, and email notifications keep all stakeholders informed automatically.

2.2 Supported Document Types

The system manages 17 types of documents used at SANPC:

SANPC DMS — Confidential | Page 3 of 31

Code	Document Type
PO	Policy
PR	Procedure
WP	Work Practice
WI	Work Instruction
ST	Standard
RM	Risk Matrix
SD	Strategy & Planning
GL	Guidelines
TR	Training Material
TS	Test Script
PF	Process Flow
F	Form / Template
COG	Corporate Governance
SP	Internal Specification
BC	Business Continuity Plan
TOR	Terms of Reference
MSM	Management System Manual

2.3 Key Principles

- **No document is released without review and approval.** Every document must go through at least one reviewer and one approver before becoming controlled.
- **Every action is audited.** The system records who did what and when.
- **Email notifications keep the process moving.** Reviewers and approvers are notified automatically; they can act directly from their email.
- **Superseded documents are preserved.** When a new version of a controlled document is released, the old version is archived (not deleted).
- **Policy documents require Board/EXCO resolution.** A special additional step applies to all Policy (PO) documents.

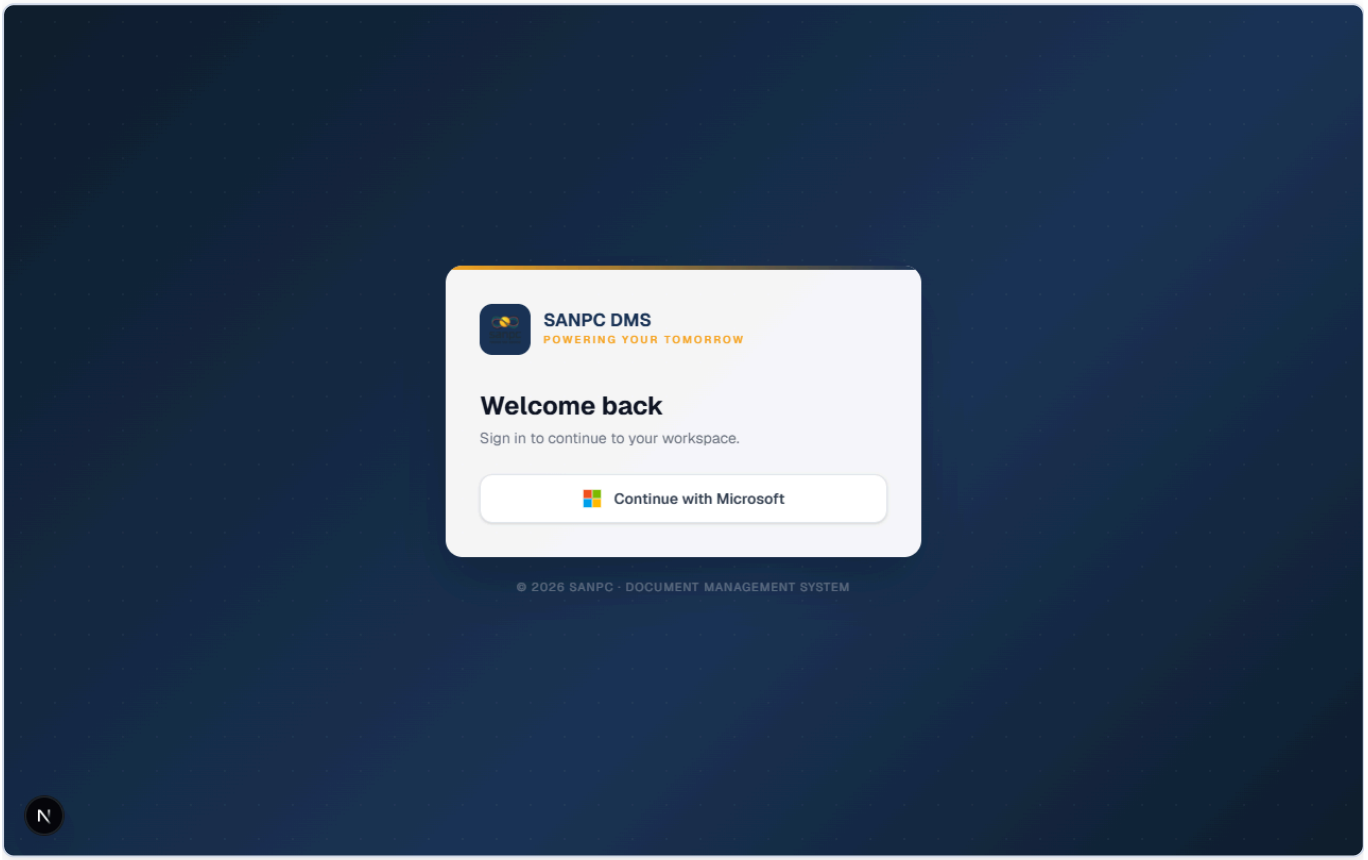

SANPC DMS — Confidential | Page 4 of 31

3. Getting Started — Logging In

3.1 Accessing the System

Open your web browser and navigate to the SANPC DMS URL provided by ICT. The system works on all modern browsers (Chrome, Edge, Firefox, Safari).

3.2 Login Options

Login Page

Figure 1 — The SANPC DMS login screen

You will see the login page with the following option:

Log in with your SANPC account (Microsoft / Entra ID)

- Click **"Continue with Microsoft"**
- You will be redirected to Microsoft's login page
- Enter your SANPC email and password as normal
- You will be redirected back to the DMS dashboard

> ***Note:*** *If you cannot log in, contact the System Administrator. Do not share your password with anyone.*

3.3 Logging Out

Click your name or profile icon in the top-right corner of the screen, then click **"Log Out"**. You will be returned to the login page.

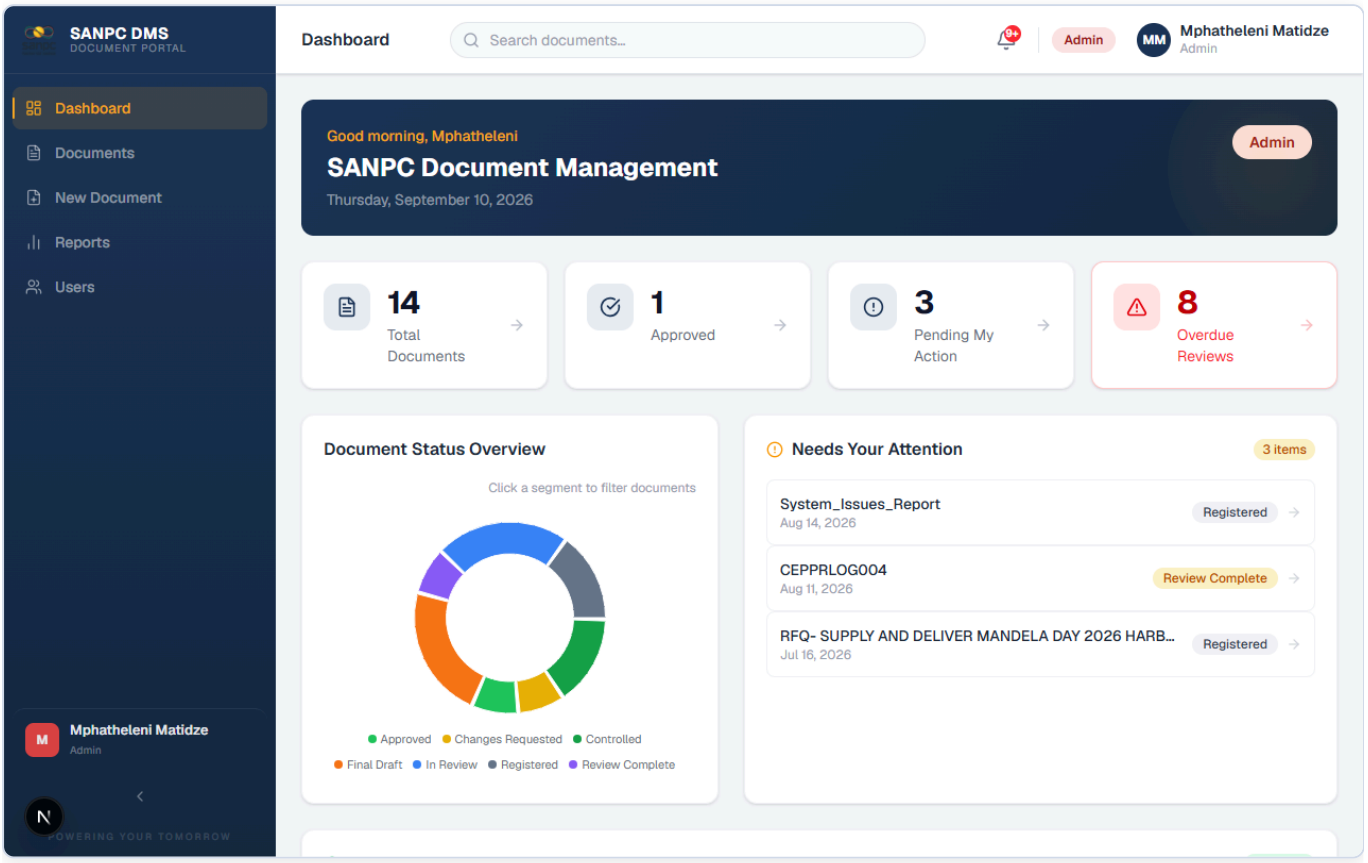

SANPC DMS — Confidential | Page 5 of 31

> ***Security Tip:*** *Always log out when you finish working, especially on shared computers.*

---

4. Understanding Your Dashboard

After logging in, you will see your personalised dashboard. What you see depends on your role.

Dashboard Overview

Figure 2 — The SANPC DMS dashboard showing stats cards, status chart, and pending actions

4.1 Dashboard Sections

Greeting Banner

A personalised greeting based on time of day ("Good Morning", "Good Afternoon", or "Good Evening") with your name.

Stats Cards (top row)

Quick summary numbers relevant to your role, such as:

- Total documents in the system
- Documents currently in review
- Documents pending your action
- SLA compliance rate

Status Distribution Chart

SANPC DMS — Confidential | Page 6 of 31

A visual breakdown of all documents by their current status (Draft, In Review, Approved, Controlled, etc.).

Recent Documents

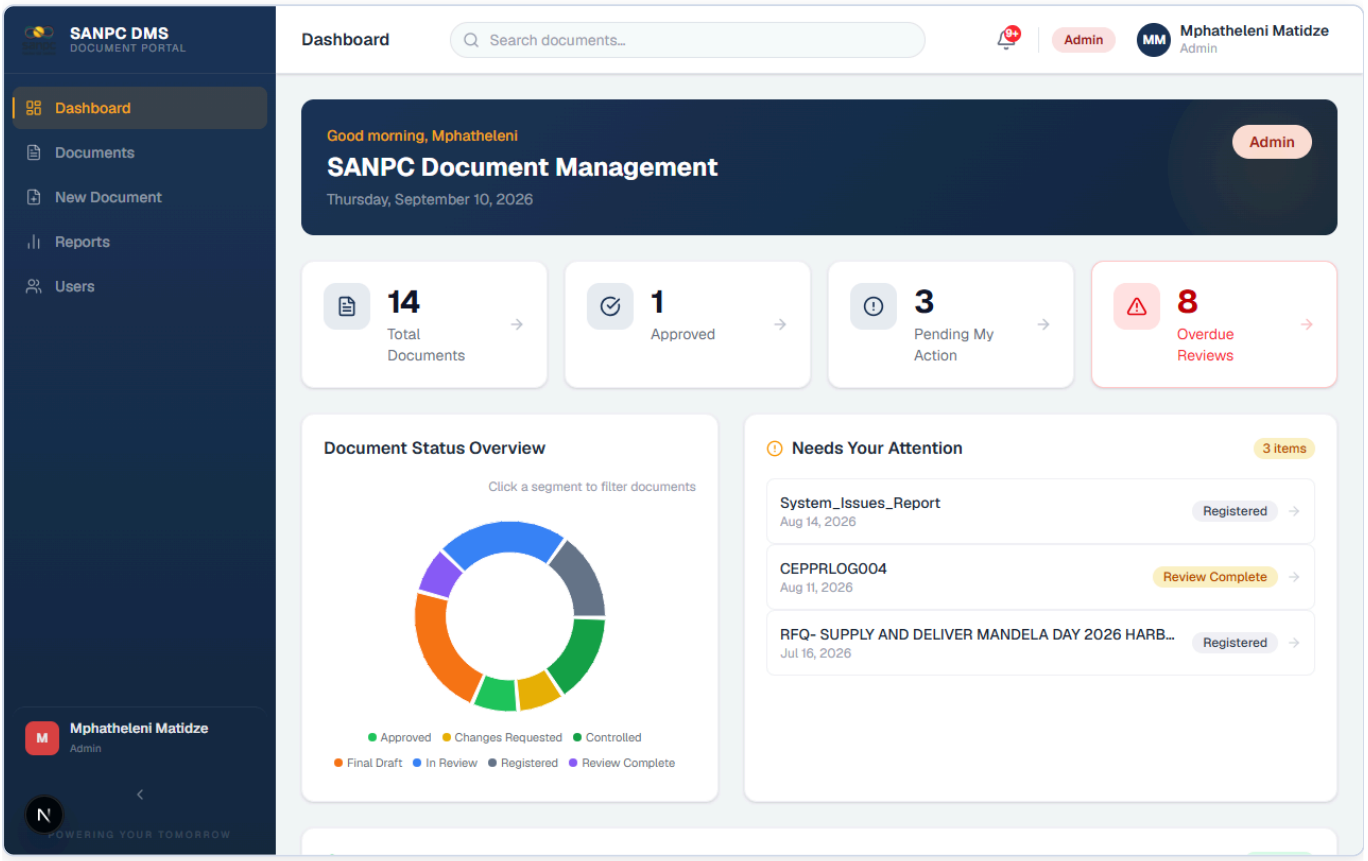

A quick list of the most recently active documents, with their status and upload date.

Pending Actions (your role-specific queue)

- **Reviewers:** Documents waiting for your review decision
- **Approvers:** Documents waiting for your approval
- **Document Controllers:** Documents in progress that need your attention
- **Administrators:** All active workflows

Completed Reviews

For reviewers and approvers — a history of decisions you have already made.

Dashboard Charts

Figure 3 — Dashboard document status distribution chart and "Needs Your Attention" panel

4.2 Sidebar Navigation

The left sidebar contains your navigation menu. Menu items vary by role:

SANPC DMS — Confidential | Page 7 of 31

Menu Item	Who Sees It
Dashboard	All users
Documents	All users
New Document	Document Controller, Admin
Reports	Document Controller, Admin
Users (Admin)	Admin only

---

5. User Roles and What They Can Do

5.1 Role Overview

The system has five roles. Each person is assigned one role by the System Administrator.

Role: ADMIN (System Administrator)

Responsibilities: Full system control, user management, system configuration

Can do everything in the system, including:

- Create, edit, and manage all documents
- Create, edit, and delete user accounts
- Assign roles to users
- Configure mandatory reviewers per document type
- Replace or remove reviewers mid-workflow
- View all documents including superseded/archived versions
- Access all reports
- Act as a reviewer or approver on any document

Role: DOCUMENT_MANAGER (Document Controller)

Responsibilities: Managing the full document lifecycle

Key capabilities:

- Upload and create new documents
- Submit documents for review
- Advance documents from review to approval
- Upload signed pages and attachments
- Upload EXCO/Board resolutions
- Release documents to CONTROLLED status
- Replace reviewers (before Final Draft stage)
- View all documents including superseded versions
- Access reports and export data

SANPC DMS — Confidential | Page 8 of 31

Cannot do:

- Manage user accounts

Role: REVIEWER

Responsibilities: Reviewing documents assigned to them and making review decisions

Key capabilities:

- View documents assigned to them for review
- Approve, reject, or request changes on documents
- Leave comments on documents
- Access documents via email links (no login required for email token links)

Cannot do:

- Upload documents
- Submit documents for review
- Access admin or reports sections

Role: APPROVER

Responsibilities: Final approval of documents after successful review

Key capabilities:

- View documents assigned to them for approval
- Approve or reject documents
- Leave comments on documents
- Also participate as reviewers when assigned

Cannot do:

- Upload documents
- Submit documents
- Access admin or reports sections

Role: ORIGINATOR

Responsibilities: Read-only tracking and reference role

Key capabilities:

- View documents that they originated
- Track the progress of their documents through the workflow

Cannot do:

- Submit, approve, or take any workflow action
- Upload documents
- Access admin, reports, or other users' documents

SANPC DMS — Confidential | Page 9 of 31

6. The Document Lifecycle

Understanding how a document moves through the system is essential for all users.

6.1 Document Status Flow

SANPC DMS — Confidential | Page 10 of 31

Additional status paths:

- Any document can be **CANCELLED** at most stages
- **REJECTED** documents can be resubmitted as new versions
- **UPDATING** — intermediate state when changes are being made after review

6.2 Status Descriptions

Status	Meaning
REGISTERED	Document has been created and saved but not yet submitted
DRAFT	Document is being prepared
IN_REVIEW	Reviewers have been notified and are working on their reviews
UPDATING	Reviews are done; document controller or originator may update file
REVIEW_COMPLETE	All reviewers have completed — waiting for Document Controller to advance
FINAL_DRAFT	Document is ready for approver review
PENDING_APPROVAL	Approvers have been formally activated
APPROVED	All approvers have approved
EXCO_PENDING	Awaiting Board/EXCO resolution (Policy documents only)
CONTROLLED	Document is officially released and in effect
SUPERSEDED	Replaced by a newer controlled version
CHANGES_REQUESTED	A reviewer/approver has requested changes — returned to originator
REJECTED	Document has been formally rejected
CANCELLED	Document workflow has been cancelled

---

7. Role Guide: Document Controller / Document Manager

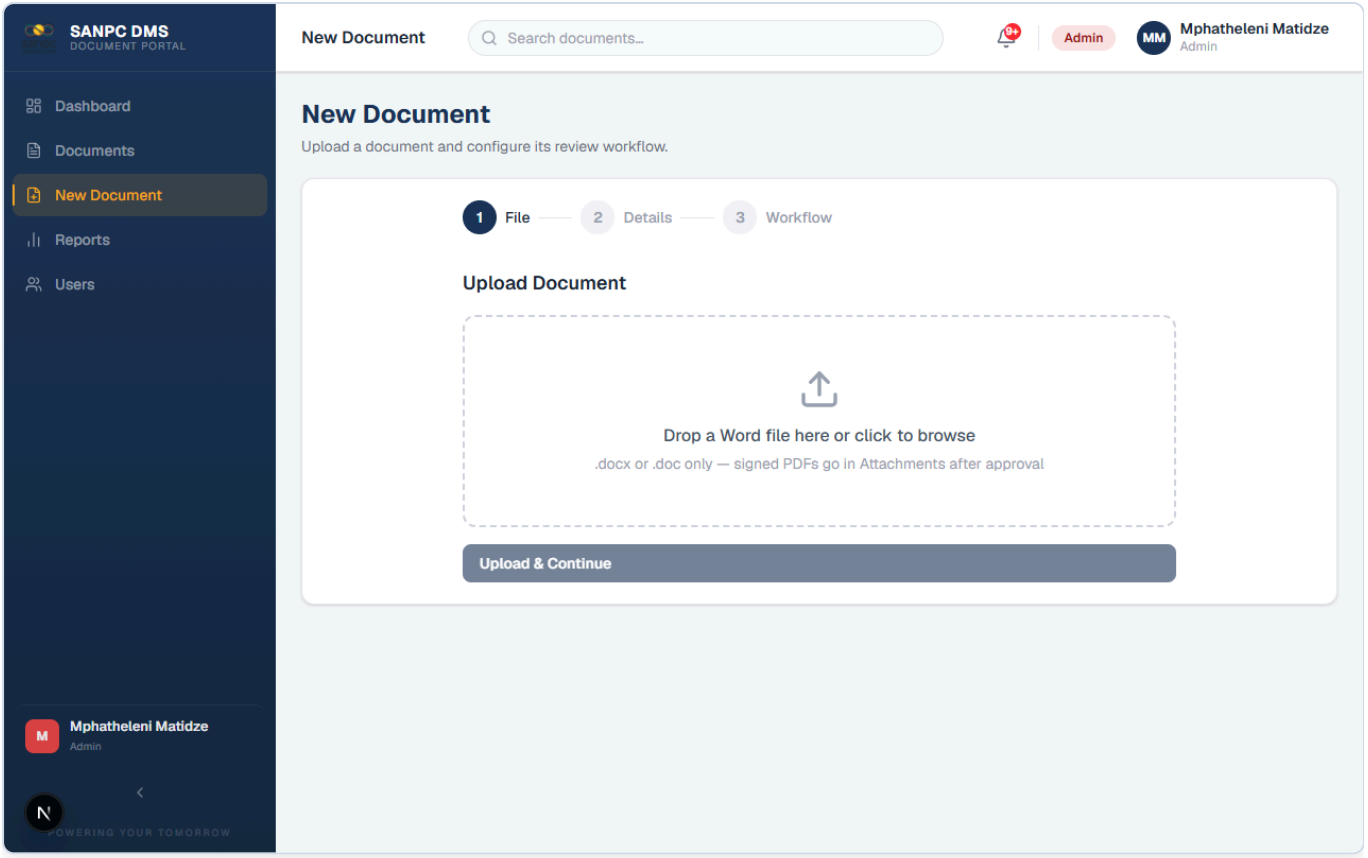

This section is for users with the **DOCUMENT_MANAGER** or **ADMIN** role.

7.1 Creating a New Document

Step 1: Start the Upload Wizard

- Click **"New Document"** in the left sidebar
- The 3-step wizard opens

SANPC DMS — Confidential | Page 11 of 31

New Document Wizard — Step 1

Figure 4 — New Document wizard: Step 1 — upload your Word document

Step 2: Upload the File

- Drag and drop your file onto the upload area, or click to browse
- Supported formats: Word (.docx), Excel (.xlsx), PDF (.pdf), and others
- The system will upload the file to SharePoint (or local storage if SharePoint is not configured)
- Wait for the green "Upload complete" indicator before proceeding
- Click **"Next"**

Step 3: Fill in Document Metadata

Fill in all required fields:

SANPC DMS — Confidential | Page 12 of 31

Field	Description	Required?
Title	Full document title	Yes
Description	Brief description of the document's purpose	Yes
Category	Select from the 17 document types	Yes
Document Number	Unique identifier (e.g., PO-001-2026). Use "Get Next Number" to auto-generate	Yes
Revision	Version revision code (e.g., "00" for new, "01" for first revision)	Yes
Originator	The person/department originating this document	Yes
Authorised By	The person who authorises this document type	Yes
Purpose	Brief statement of the document's purpose	No
Original Date	The original creation date of the document	No
Next Review Date	When this document should next be reviewed	No
Tags	Keywords for searching (optional)	No

Click **"Next"** when done.

Step 4: Configure the Workflow

- **Reviewers:** Add the people who must review this document

- Type a name to search for users
- Mandatory reviewers for this document type will be pre-loaded automatically
- You can add additional reviewers
- Order them by dragging if a specific sequence is needed

- **Approvers:** Add the people who must formally approve this document

- At least one approver is required

- **Review Deadline:** Set the deadline by which reviewers must complete their review

- The minimum is 21 days (regulatory requirement)
- The date cannot be set to less than 21 days from today

- **EXCO Required:** For Policy (PO) documents, this is automatically enabled
- Click **"Submit"** or **"Save as Draft"**

> ***Tip:*** *Saved drafts appear in the document list with REGISTERED status. You can return to submit them later.*

SANPC DMS — Confidential | Page 13 of 31

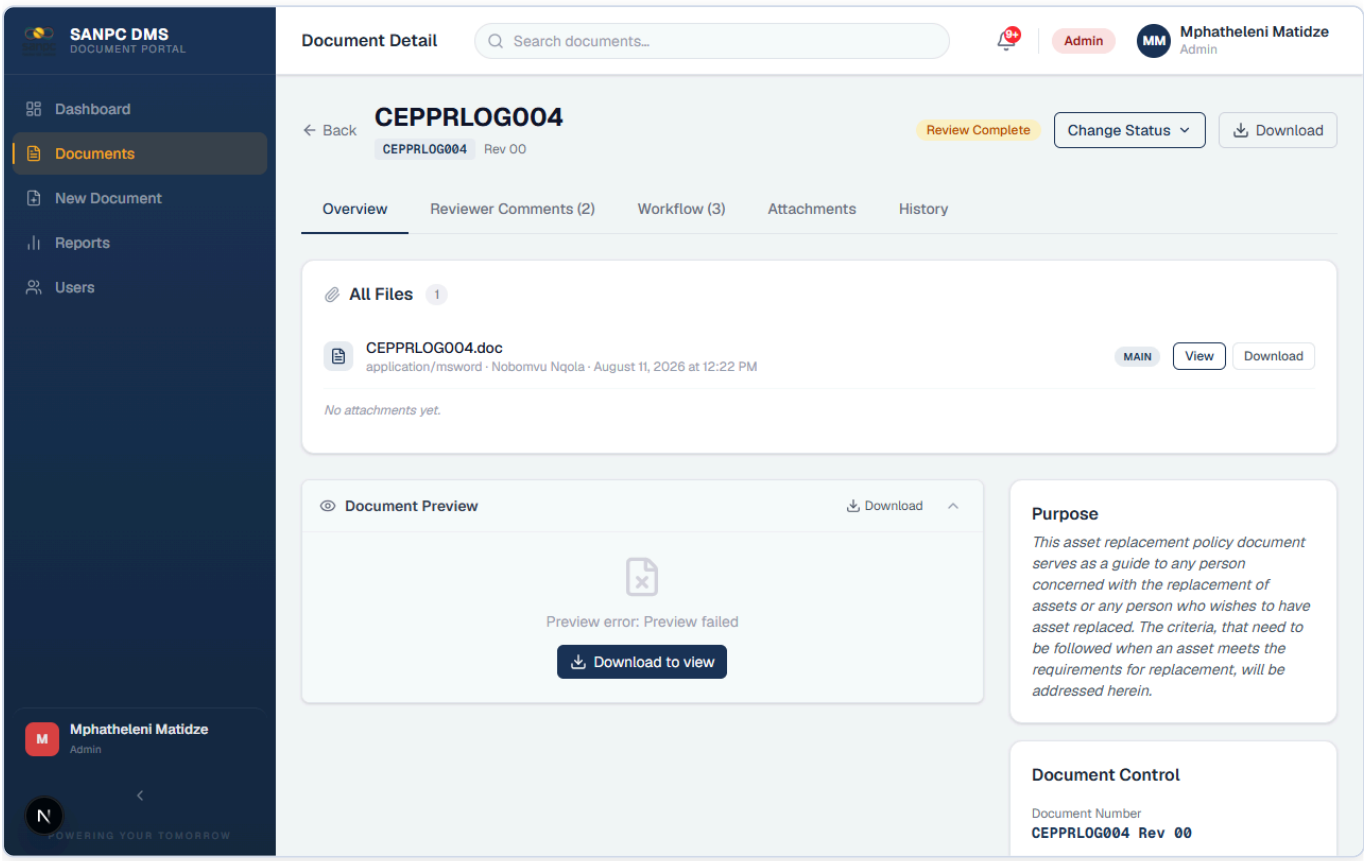

7.2 Submitting a Document for Review

If you saved the document as a draft, or need to resubmit after changes:

- Open the document from the Documents list
- In the right-side Review Panel, click **"Submit for Review"**
- Confirm the action in the dialog
- The system will:

- Notify all reviewers by email with a direct review link
- Set the deadline countdown
- Change the document status to **IN_REVIEW**

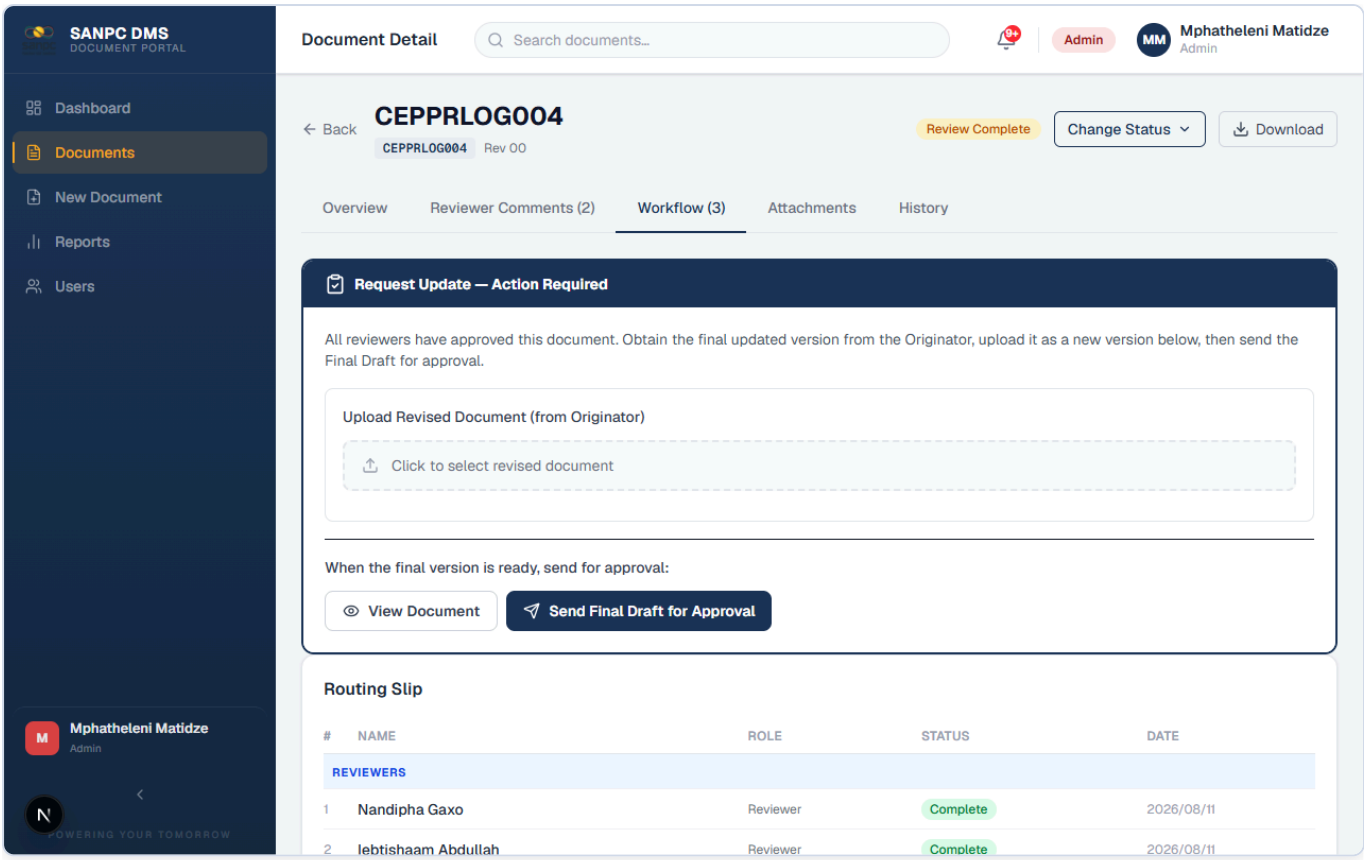

7.3 Monitoring Review Progress

Document Detail — Overview

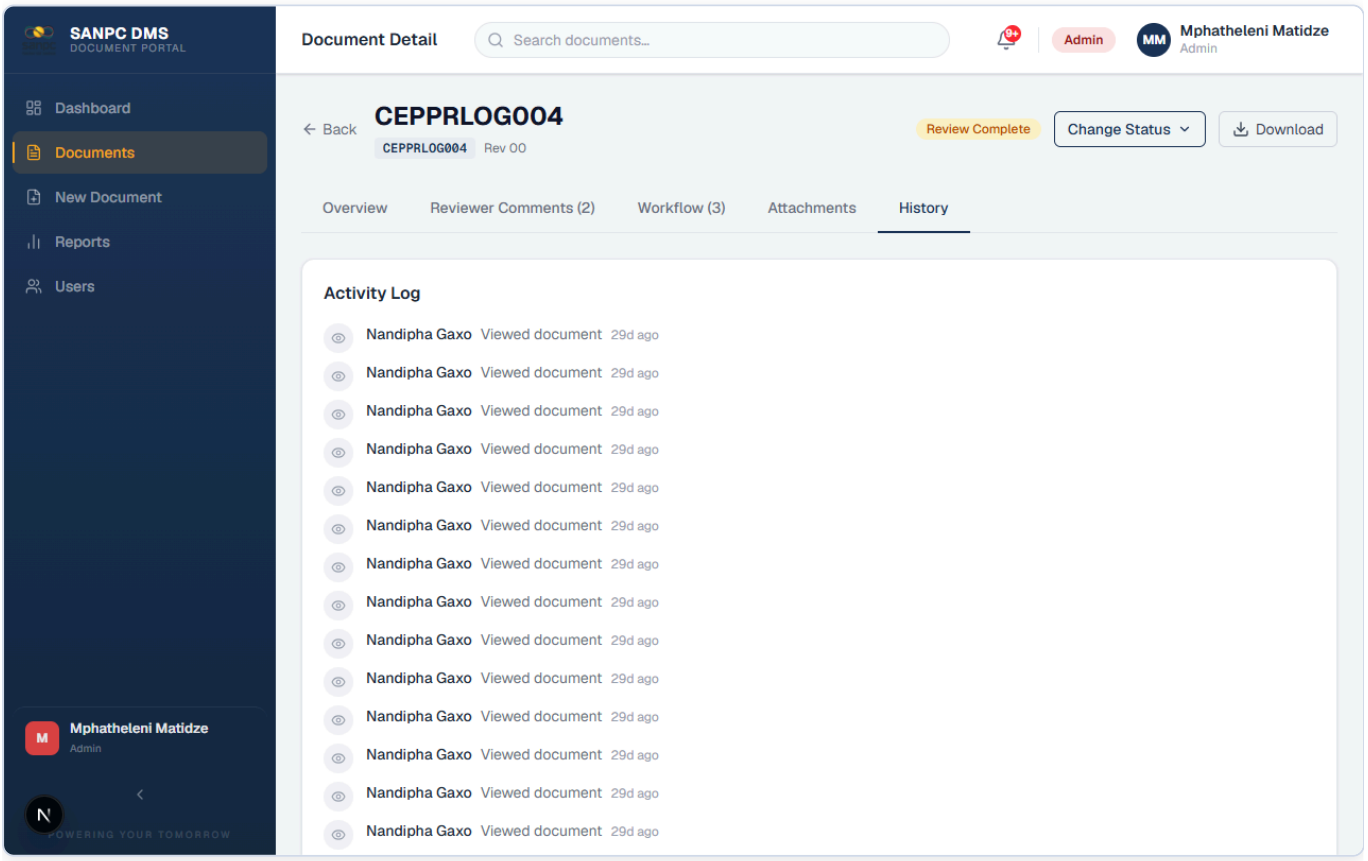

Figure 8 — Document detail page showing file preview, document metadata, and status

SANPC DMS — Confidential | Page 14 of 31

Document Detail — Workflow Tab

Figure 9 — Workflow tab showing the routing slip: reviewers, approvers, their status and completion dates

Document Detail — History Tab

SANPC DMS — Confidential | Page 15 of 31

Figure 10 — History tab showing the full activity audit log for a document

On the document detail page, the **Review Panel** shows:

- Each reviewer's name and current status (Pending, In Progress, Approved, Changes Requested, Rejected)
- The deadline date
- Whether the deadline has passed (shown in red)

You can also see all reviewer comments in the **Comments** section below.

7.4 Replacing or Removing a Reviewer

If a reviewer is unavailable or needs to be changed:

- Open the document detail page
- Find the reviewer in the Review Panel
- Click the **"Replace"** button next to their name
- Search for and select the new reviewer
- Confirm the replacement

> ***Note:*** *Reviewer replacement is blocked after the document reaches FINAL_DRAFT stage. Contact the Administrator if replacement is needed after that point.*

To remove a reviewer entirely:

- Click **"Remove"** next to their name
- The reviewer is removed but an audit record is preserved

7.5 Advancing to Approval

Once all reviewers have completed their reviews:

- The document status changes to **REVIEW_COMPLETE**
- Open the document and click **"Advance to Approval"** in the Review Panel
- The system activates all approvers and sends them email notifications
- Document status changes to **PENDING_APPROVAL**

7.6 Releasing a Controlled Document (Non-Policy)

Once all approvers have approved:

- Document status is **APPROVED**
- Open the document
- In the Review Panel, click **"Mark as Controlled"**
- Confirm the action
- The system will:

- Change status to **CONTROLLED**

SANPC DMS — Confidential | Page 16 of 31

- Automatically find any previous controlled version of the same document number and mark it **SUPERSEDED**

- Record the controlled date and set the 40-year retention date

---

7.7 Releasing a Policy Document (EXCO Process)

Policy documents (type code: PO) require Board/EXCO resolution before being controlled.

After all approvers approve (status = APPROVED):

- Open the document
- Click **"Submit to EXCO"** in the Review Panel
- Status changes to **EXCO_PENDING**

After the Board meeting:

- Open the document
- In the Attachments section, upload the Board/EXCO resolution document
- Fill in the Resolution Number and Resolution Date (optional but recommended)
- Click **"Record Resolution & Control"**
- Status changes to **CONTROLLED**

7.8 Uploading a Signed Page

After a document is APPROVED or CONTROLLED, you can upload the signed physical page:

- Open the document
- Scroll to the **Attachments** section
- Click **"Upload Signed Page"**
- Select the scanned PDF of the signed page
- The signed page is now stored and linked to the document

7.9 Amending a Document File

If corrections to the file are needed before approval is complete:

- Open the document
- Click **"Amend File"** in the Review Panel
- Upload the corrected file
- The amendment is logged in the Version History
- Reviewers and approvers will see the updated file

> ***When can you amend?*** *You can amend the file when the document is in FINAL_DRAFT, PENDING_APPROVAL, REJECTED, or CHANGES_REQUESTED status.*

SANPC DMS — Confidential | Page 17 of 31

8. Role Guide: Reviewer

This section is for users with the **REVIEWER** role.

8.1 How You Will Be Notified

When a document is submitted for review and you are assigned as a reviewer, you will receive an email notification. The email will contain:

- The document title and number
- A link to view the document
- The deadline by which you must complete your review
- **Two buttons: "Approve" and "Request Changes"** (for quick action directly from email)

8.2 Accessing Documents for Review

Option A — Via Email Link

- Click the review link in your email
- You will be taken directly to the review page — **no login is required**
- You can view the document and submit your decision

Option B — Via the DMS Portal

- Log in to the DMS
- Go to **Dashboard** — your pending reviews appear in the "Pending Actions" section
- Or go to **Documents** and filter by your assigned reviews

8.3 Reviewing a Document

On the document review page, you will see:

- **Document Viewer** — view the document directly in the browser (PDF, Word, Excel)
- **Document Metadata** — title, number, category, description, originator
- **Comments** — any comments from the document controller or other reviewers
- **Your Review Decision Panel** (on the right)

To submit your review:

- Read the document in the viewer
- In the Review Panel, select your decision:

- **Approve** — you are satisfied the document is correct

- **Request Changes** — you have specific changes that must be made before approval

- **Reject** — the document should not proceed in its current form

- Add your comment in the **Comments** field:

- If approving: a comment is optional ("No comment" will be recorded if left blank)

- If requesting changes or rejecting: please provide a clear description of the issue

- Click **"Submit Decision"**

SANPC DMS — Confidential | Page 18 of 31

8.4 What Happens After Your Decision

Your Decision	What Happens
Approve	Your review is marked complete. Other reviewers continue in parallel. When all reviewers approve, the document advances.
Request Changes	All other reviews are paused. The document is returned to the Document Controller with your comments.
Reject	All other reviews are halted. The Document Controller is notified. The document may be resubmitted as a new version.

8.5 If You Have Already Reviewed

If you click an email link for a review you have already completed, the system will show you a message indicating your decision has been recorded. You cannot change a submitted review decision.

---

9. Role Guide: Approver

This section is for users with the **APPROVER** role.

9.1 How You Will Be Notified

You will receive two types of email notifications:

- **Heads-Up Email** — sent when reviewers are first activated. This gives you advance notice that the document is coming your way.
- **Approval Request Email** — sent when it is your turn to formally approve. Contains direct Approve/Reject buttons.

9.2 Reviewing the Document for Approval

When you receive the approval request email:

- Click the **"View Document"** link or the **"Approve"** / **"Reject"** button in the email
- The system takes you to the document (no login required if using the email link)
- Review the full document and all metadata
- Check the reviewer comments if any were made

9.3 Making Your Approval Decision

In the Approval Panel:

- Select your decision:

- **Approve** — you formally approve this document for release

- **Reject** — you reject this document; provide a clear reason

SANPC DMS — Confidential | Page 19 of 31

- Add your comment (required for rejections; optional for approvals)
- Click **"Submit Decision"**

> ***Important:*** *Your approval is a formal record. Ensure you have fully read the document before approving.*

9.4 Outcome After Your Decision

Your Decision	What Happens
Approve (and all others also approve)	Document advances to APPROVED status. Document Controller is notified to release it.
Approve (but others still pending)	Your approval is recorded. Other approvers continue.
Reject	All other approvals are halted. The document returns to the Document Controller.

---

10. Role Guide: Originator

This section is for users with the **ORIGINATOR** role.

10.1 What You Can See

As an Originator, you can:

- View all documents where you are listed as the Originator
- See the current status of each document
- Read comments and activity history
- View the document file

10.2 What You Cannot Do

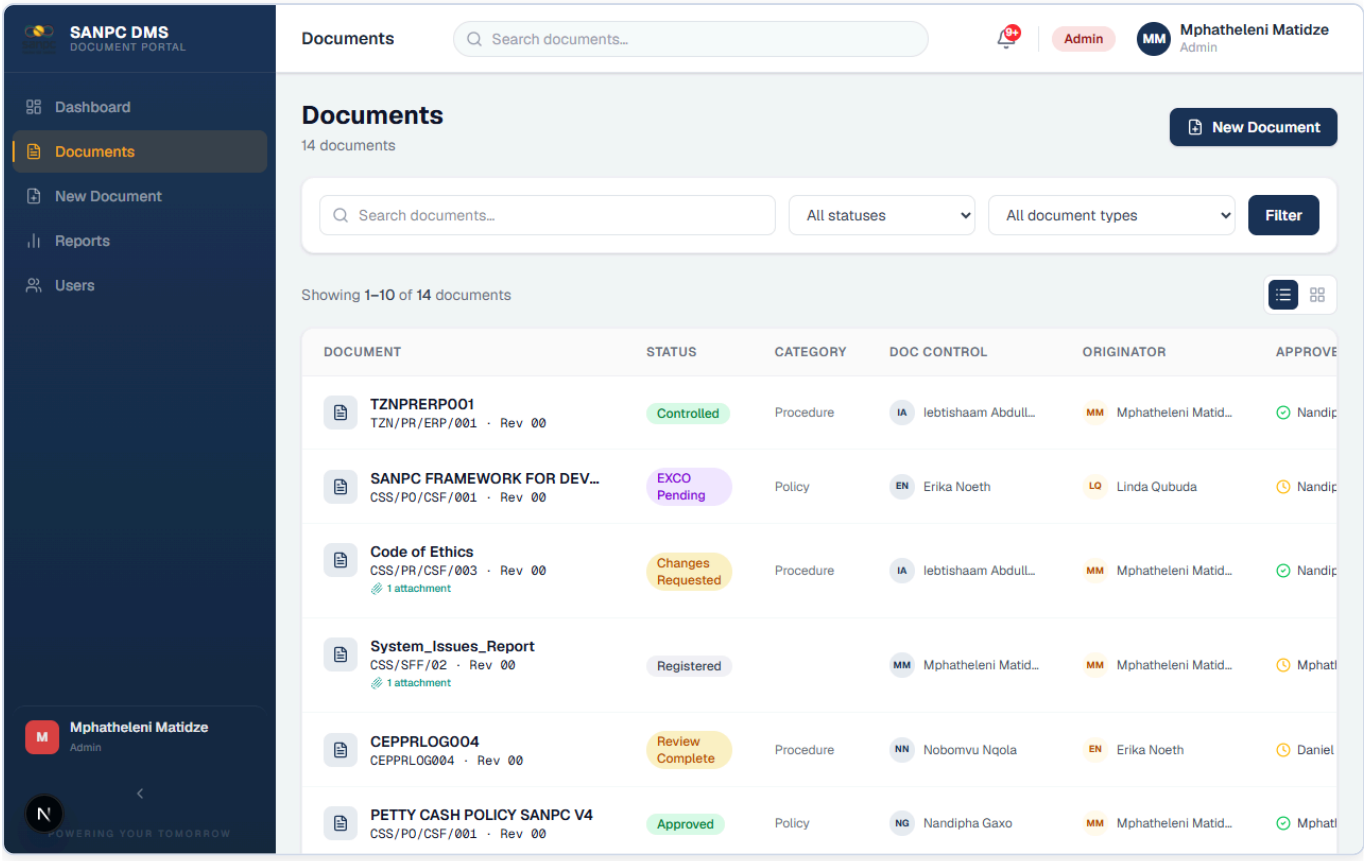

Originators have read-only access. You cannot:

- Submit documents for review
- Make review or approval decisions
- Upload or amend files

If you need to make changes to a document, contact your Document Controller.

SANPC DMS — Confidential | Page 20 of 31

10.3 Tracking Your Documents

Documents List

Figure 11 — The Documents list page with search, status filter, document type filter, and all documents visible

- Log in and go to **Documents**
- All documents where you are listed as Originator will be visible
- Use the status filter to see documents in specific stages

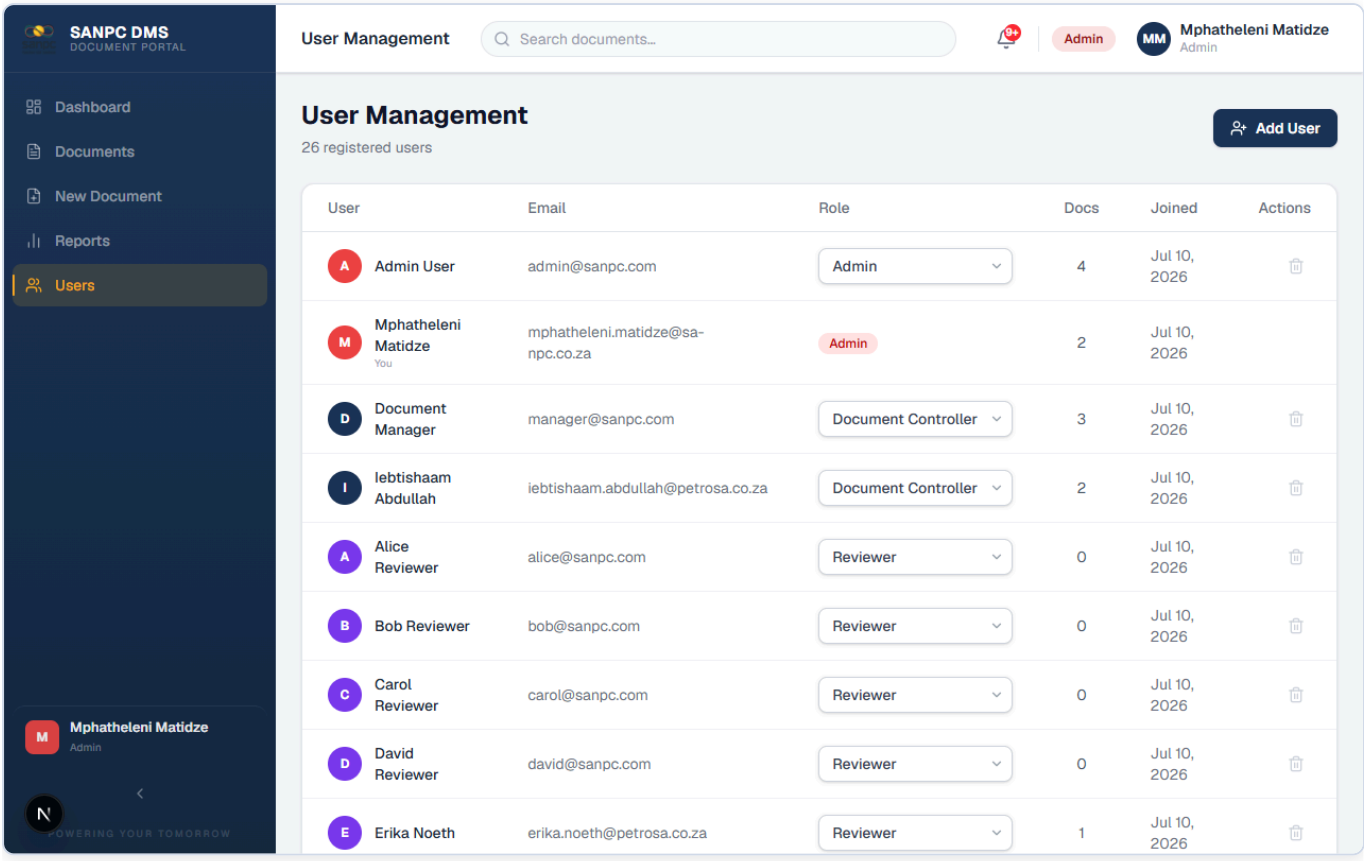

---

11. Role Guide: System Administrator

This section is for users with the **ADMIN** role. Administrators have all the Document Controller capabilities plus the following.

SANPC DMS — Confidential | Page 21 of 31

11.1 User Management

User Management

Figure 6 — Admin: User Management page showing all registered users with roles and document counts

To view all users:

- Click **"Users"** or **"Admin"** in the left sidebar
- The user list shows all registered users with their roles, email addresses, and document counts

To create a new user:

- Click **"New User"** or the **"+"** button
- Fill in:

- Full Name

- Email Address

- Role (Admin, Document Manager, Reviewer, Approver, Originator)

- Department Role (optional — informational field for display)

- Password (set an initial password; user should change it at first login)

- Click **"Create User"**

To edit a user:

- Click on the user's name or the edit icon
- Update their name, role, or department role
- Click **"Save"**

SANPC DMS — Confidential | Page 22 of 31

To delete a user:

- Click the delete icon next to the user
- Confirm the deletion
- The user account is removed. Documents they created remain in the system.

> ***Warning:*** *Deleting a user who has active review assignments may affect ongoing workflows. Ensure they are replaced on all active documents first.*

11.2 Configuring Mandatory Reviewers

Mandatory reviewers are automatically added to every document of a specific type. For example, the Compliance Officer might be a mandatory reviewer on all Policy documents.

To configure mandatory reviewers:

- In the Admin panel, find the **"Mandatory Reviewers"** section
- Select the **Document Type** from the dropdown
- Search for and select the user to make mandatory for that type
- Click **"Add"**
- To remove, click the **"Remove"** button next to the assignment

> ***Effect:*** *When a Document Controller creates a new document of that type, this reviewer is automatically pre-loaded in the reviewer list.*

11.3 Replacing Reviewers Mid-Workflow

As Admin, you can replace any reviewer at any stage:

- Open the document
- Find the reviewer in the Review Panel
- Click **"Replace"**
- Select the replacement user
- The new reviewer receives an email notification

---

12. Document Categories and Type Codes

The following table shows all document types supported in the system, their codes, and brief descriptions.

SANPC DMS — Confidential | Page 23 of 31

Code	Category	Description
PO	Policy	Organisational policies. Requires Board/EXCO resolution before release.
PR	Procedure	Step-by-step procedures for how tasks are performed.
WP	Work Practice	Best practice guidelines for performing specific work.
WI	Work Instruction	Detailed instructions for a specific task or operation.
ST	Standard	Technical standards and specifications.
RM	Risk Matrix	Risk assessment and management matrices.
SD	Strategy & Planning	Strategic plans and planning documents.
GL	Guidelines	Guidance documents and advisory content.
TR	Training Material	Training materials, courses, and learning content.
TS	Test Script	Test plans, test scripts, and quality assurance documents.
PF	Process Flow	Process flow diagrams and workflow documentation.
F	Form/Template	Blank forms and reusable templates.
COG	Corporate Governance	Corporate governance documents and charters.
SP	Internal Specification	Internal technical or operational specifications.
BC	Business Continuity Plan	Business continuity and disaster recovery plans.
TOR	Terms of Reference	Terms of reference for committees and working groups.
MSM	Management System Manual	Management system manuals and handbooks.

---

13. Document Numbering Convention

13.1 Format

Document numbers follow the format:

```
```

SANPC DMS — Confidential | Page 24 of 31

```
[TYPE CODE]-[SEQUENCE NUMBER]-[YEAR]
```

Examples:

- PO-001-2026 — First Policy document created in 2026
- PR-005-2026 — Fifth Procedure document created in 2026
- TR-012-2025 — Twelfth Training Material created in 2025

13.2 Auto-Generation

When creating a new document, click **"Get Next Number"** to auto-generate the next available number for the selected document type and current year.

13.3 Revision Numbers

- New documents start at revision **"00"**
- First revision after release: **"01"**
- Second revision: **"02"** — and so on

The revision number is manually set by the Document Controller when creating the document.

---

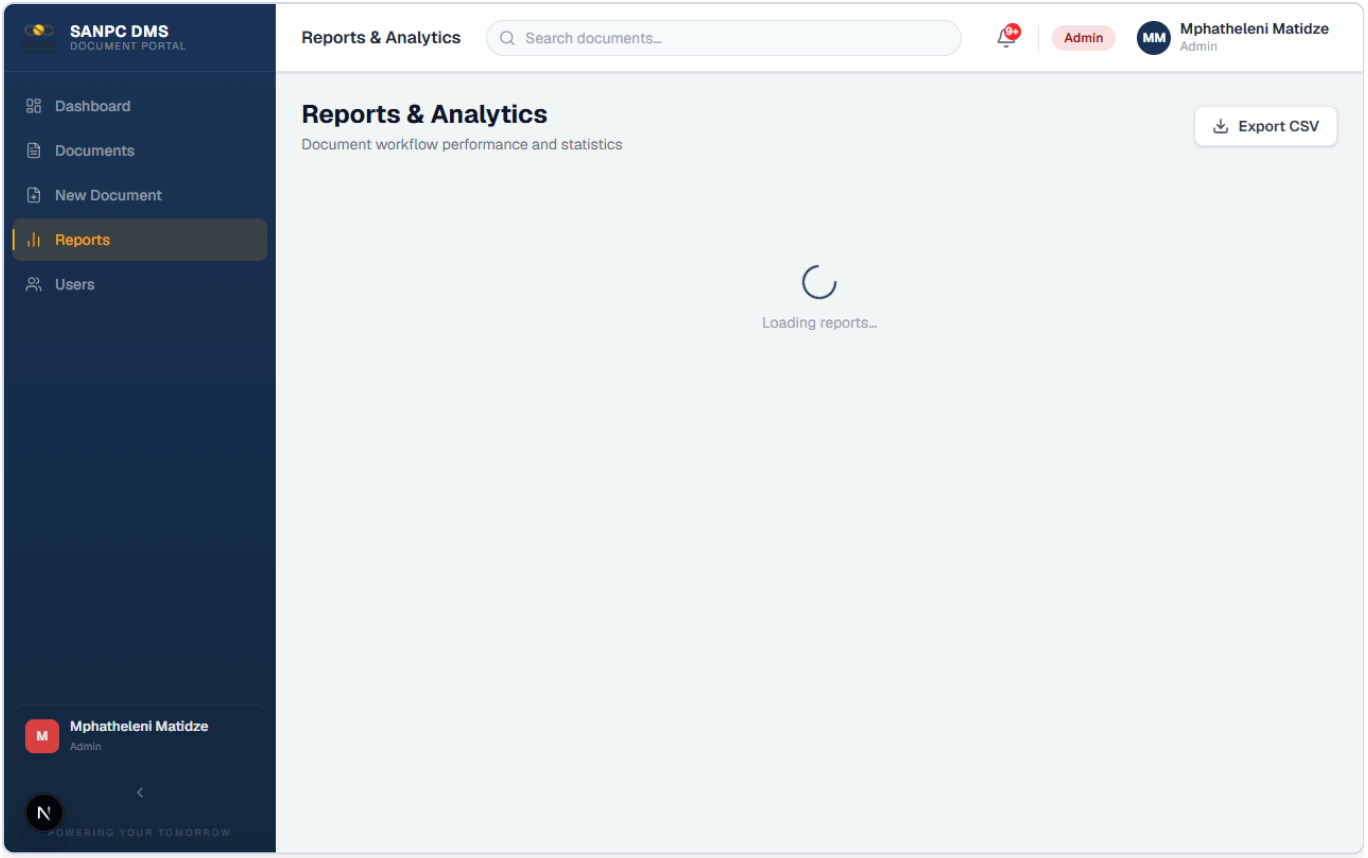

14. Reports and Analytics

Reports are available to **Document Controllers** and **Administrators** only.

14.1 Accessing Reports

Click **"Reports"** in the left sidebar.

SANPC DMS — Confidential | Page 25 of 31

Reports Page

Figure 7 — Reports and analytics page with status distribution and SLA metrics

14.2 Available Reports

Document Status Distribution

A chart showing how many documents are in each status. Useful for understanding the overall pipeline load.

Review SLA Analytics

- Average time to complete a review
- Percentage of reviews completed on time vs overdue
- SLA compliance rate

Rejection Rate

Percentage of documents that were rejected at the review or approval stage.

Average Review Time

How long, on average, it takes from submission to completion of all reviews.

14.3 Exporting Data

Click **"Export to CSV"** to download a full data export of all documents, including their metadata, status, dates, and reviewer information. This can be opened in Microsoft Excel for further analysis.

SANPC DMS — Confidential | Page 26 of 31

15. Notifications and Email Links

15.1 In-System Notifications

The bell icon in the top navigation bar shows your unread notifications. Click it to see all notifications, including:

- Documents assigned to you for review or approval
- Updates on documents you created or follow
- System alerts

Click **"Mark as Read"** or click the notification to go to the relevant document.

15.2 Email Notifications

The system sends automated emails for key events:

Email Type	Sent To	When Triggered
Review Assignment	All assigned Reviewers	When document is submitted for review
Heads-Up	All assigned Approvers	When review stage begins (advance notice)
Document Controller Notification	Document Controller	When workflow starts
Review Complete	Document Controller	When all reviews are done
Approval Request	All assigned Approvers	When advanced to approval stage
Approved/Rejected	Originator & Document Controller	When final approval decision is made
Reminder	Reviewers with pending reviews	After 18 days without action

15.3 Acting Directly from Email

Reviewer and approver emails contain action buttons. You can:

- Click **"Approve"** in the email to directly record your approval — no login required
- Click **"Request Changes"** to flag the document for revision
- Click **"View Document"** to open the full document in the browser

> ***Security Note:*** *Email review links are unique and expire once used or when the document moves to a new stage. If a link does not work, log in to the DMS directly.*

SANPC DMS — Confidential | Page 27 of 31

16. Frequently Asked Questions

Q: I cannot log in. What should I do?

A: Check that you are using the correct email address. If you are using your Microsoft account, make sure you are signing in with your SANPC email. If using a local password, contact the System Administrator to reset your password.

Q: I received a review email but the document is already marked as completed. Why?

A: Another reviewer may have requested changes or rejected the document, which paused or ended your review. Log in to the DMS to see the current status. Or the document may have been resubmitted — your link is for the previous submission only.

Q: I accidentally approved a document. Can I undo it?

A: Decisions cannot be reversed directly by the reviewer. Contact your Document Controller or System Administrator, who can replace your reviewer slot and re-activate the review.

Q: Can I see documents that I am not assigned to?

A: It depends on your role. Reviewers and Approvers can only see documents they are assigned to or that they originated. Document Controllers and Admins can see all documents.

Q: Why can I not see certain documents that I know exist?

A: The document may have been SUPERSEDED (replaced by a newer version). Superseded documents are hidden from Reviewers and Approvers. Contact your Document Controller to access superseded documents.

Q: How do I know when my review is due?

A: The deadline is shown in the Review Panel on the document page and in the original email notification. If you are approaching the deadline, a reminder email will be sent at 18 days.

Q: A colleague left the organisation and they are assigned as a reviewer. What happens?

A: The Document Controller or Administrator can replace that reviewer. The new reviewer will receive a notification to complete the review.

Q: Why does my Policy document have an extra step after approval?

A: Policy documents (type code PO) require a Board/EXCO resolution before they can be released to CONTROLLED status. This is a governance requirement. The Document Controller will upload the resolution document after the Board meeting.

Q: Can I upload multiple files for one document?

SANPC DMS — Confidential | Page 28 of 31

A: The main document is a single file. However, you can upload additional supporting files as Attachments (available after APPROVED status) — such as signed pages, Board resolutions, or supplementary materials.

Q: How long are documents kept in the system?

A: Controlled documents have a 40-year retention period from the date they were released. Superseded documents are retained as an archive. The system records the Retention Date automatically.

---

17. Glossary

Term	Definition
Controlled Document	A document that has completed the full review, approval, and release process and is now officially in effect
Document Controller	The person responsible for managing document workflows; also called Document Manager
Document Number	A unique identifier assigned to a document following the SANPC naming convention
EXCO	Executive Committee — the governing body whose resolution is required for Policy documents
Mandatory Reviewer	A user automatically added as a reviewer for a specific document type, configured by the Administrator
Originator	The person or department that created or owns the document (not necessarily the person who uploaded it to the system)
Retention Date	The date after which a document may be disposed of, calculated automatically as 40 years from the controlled date
Revision	The version iteration of a document (00, 01, 02, etc.)
SLA	Service Level Agreement — the agreed timeframe within which a review must be completed (minimum 21 days)
Superseded	A document replaced by a newer controlled version; still accessible by Document Controllers and Admins for reference
Token Link	A unique, secure link embedded in emails allowing reviewers to take action without logging in
Workflow	The sequence of steps a document follows from creation to controlled release

Appendix A: Quick Reference Card

For Reviewers

- Check email for review request
- Click the review link
- Read the document
- Click Approve, Request Changes, or Reject
- Add a comment if needed
- Submit

For Approvers

- Check email for approval request
- Click the approval link
- Read the document and reviewer comments
- Click Approve or Reject
- Add a comment
- Submit

For Document Controllers

- Upload file → Fill metadata → Set reviewers/approvers → Submit
- Monitor review progress on document detail page
- When REVIEW_COMPLETE → Click "Advance to Approval"
- When APPROVED → Click "Mark as Controlled" (or EXCO process for policies)

Appendix B: Document Workflow Decision Tree

```
Is this a Policy document (PO)?
|
├─ YES → After approval, submit to EXCO
| Upload Board resolution
| Release to CONTROLLED
|
└─ NO → After approval, release directly to CONTROLLED
System auto-supersedes previous version
```
